

easYgen-300 Series Genset Controls

easYgen-300 Series

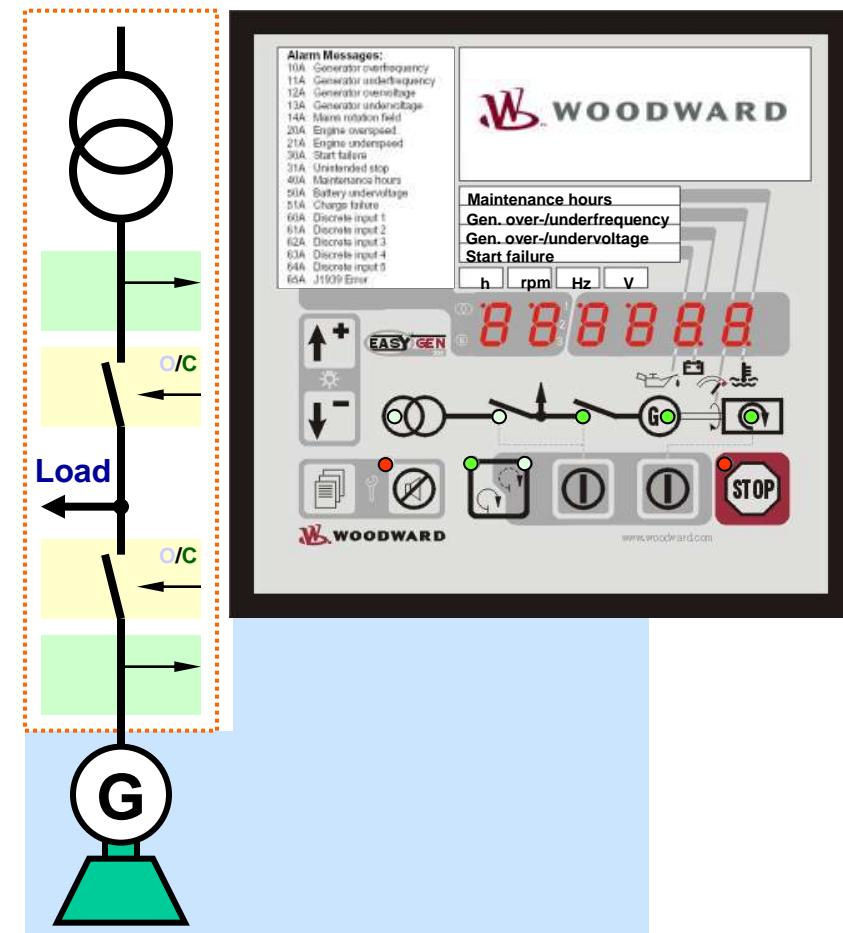

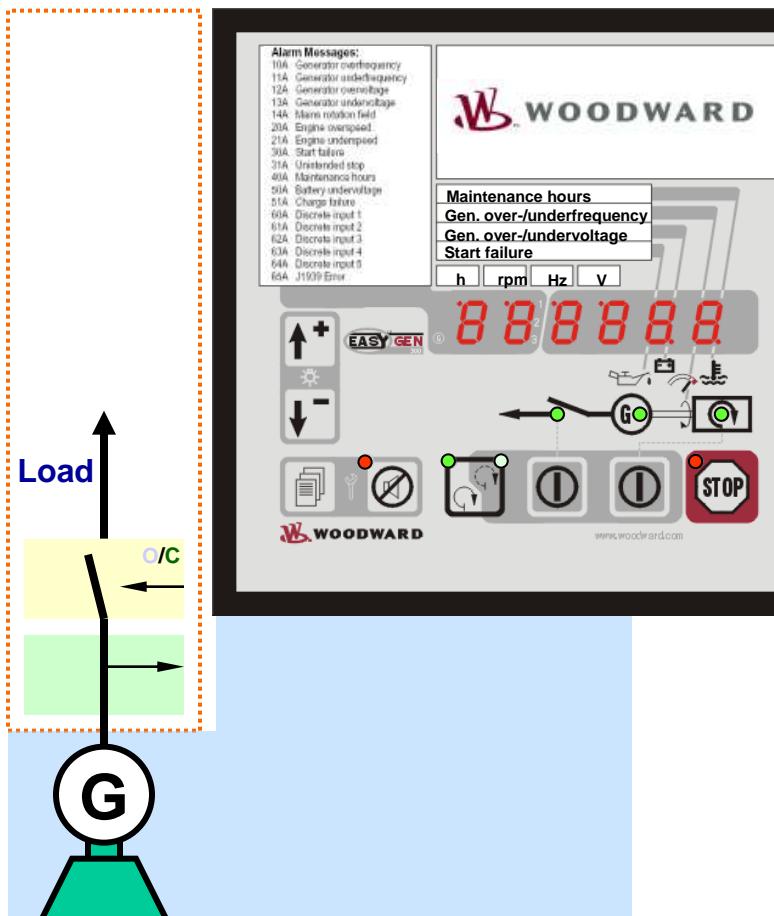

easYgen-320

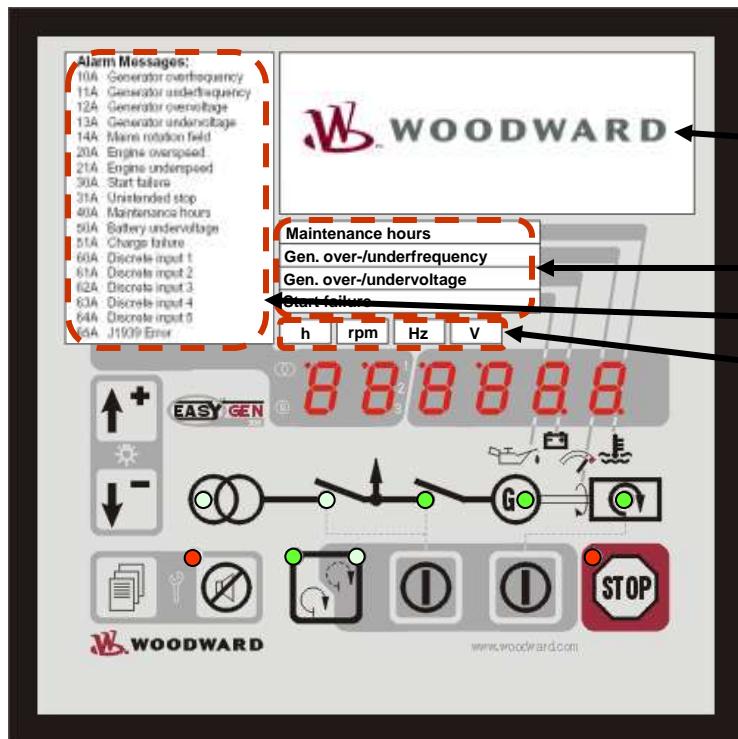

easYgen-350

easYgen-300 Series

easYgen-300: Front Panel

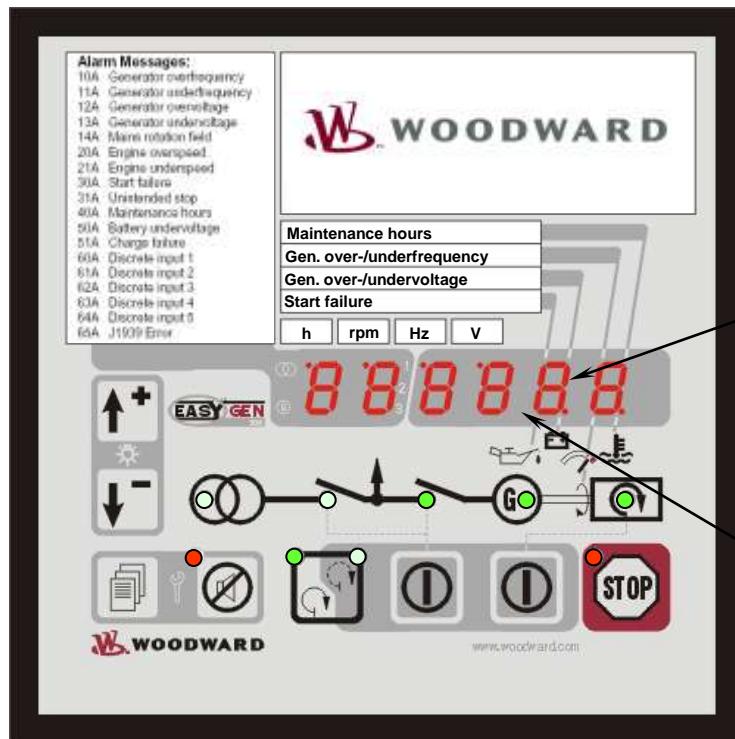

easYgen-350

printable paper strip inserts for

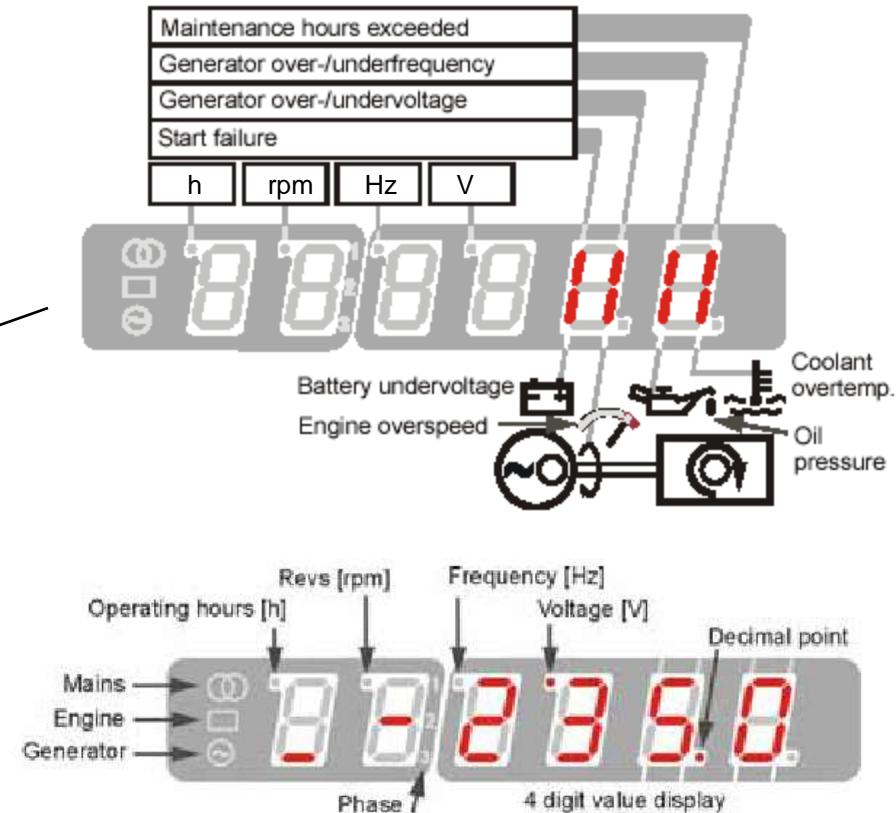

- company brand label or ECU alarm codes list
- 4 Annunciator text messages
- 18 Alarm messages
- legend for 4 annunciator lights

WOODWARD provides a Word file to generate customized paper strip inserts which may be printed in multiple languages.
easYgens include a pre-defined paper strip.

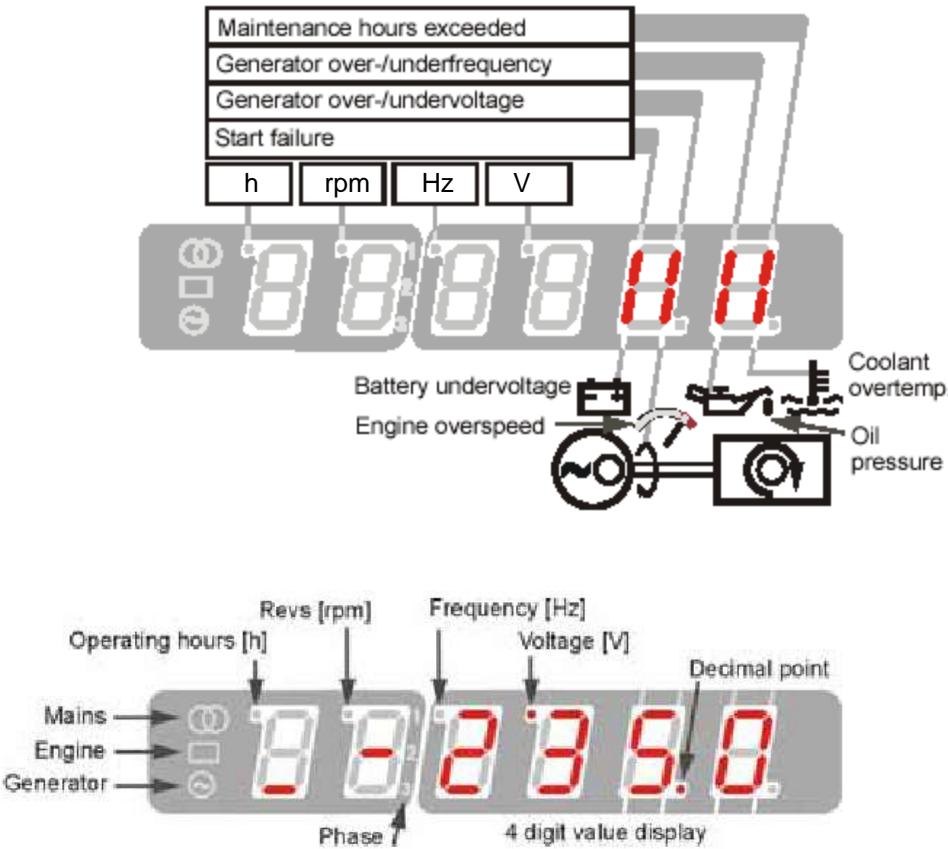

easYgen-300: 7-Segment-Display

easYgen-350

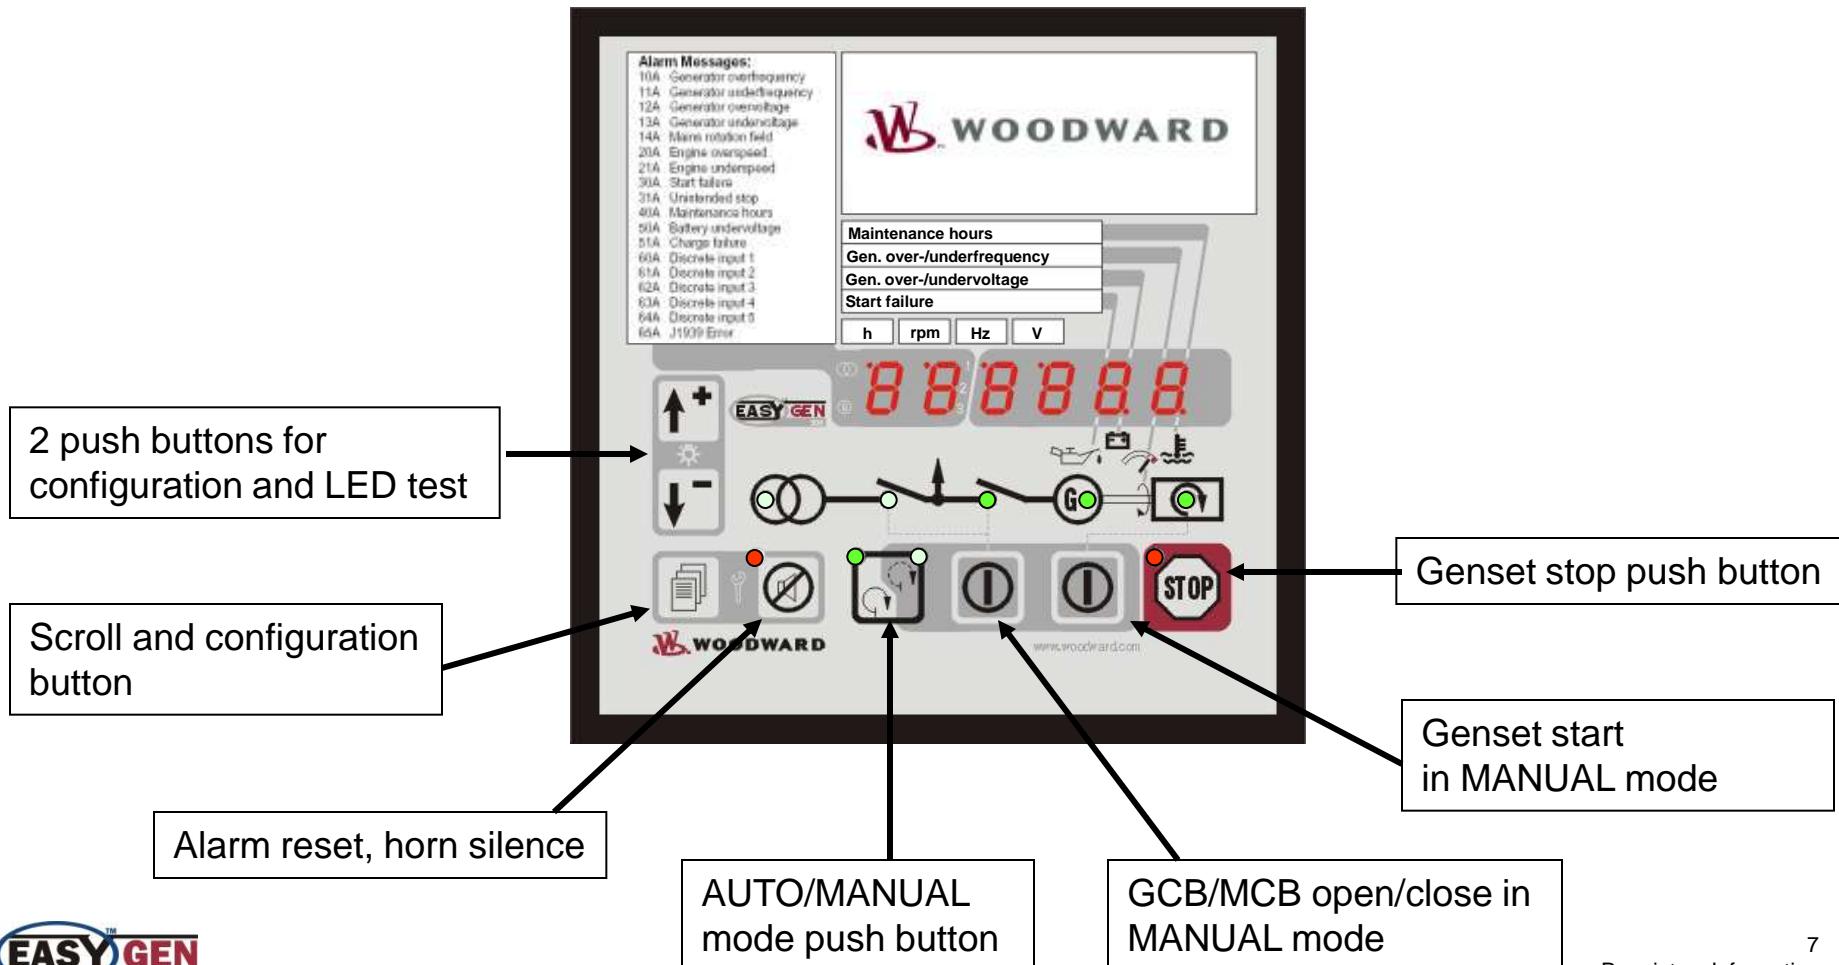

easYgen-300: 7-Segment-Display

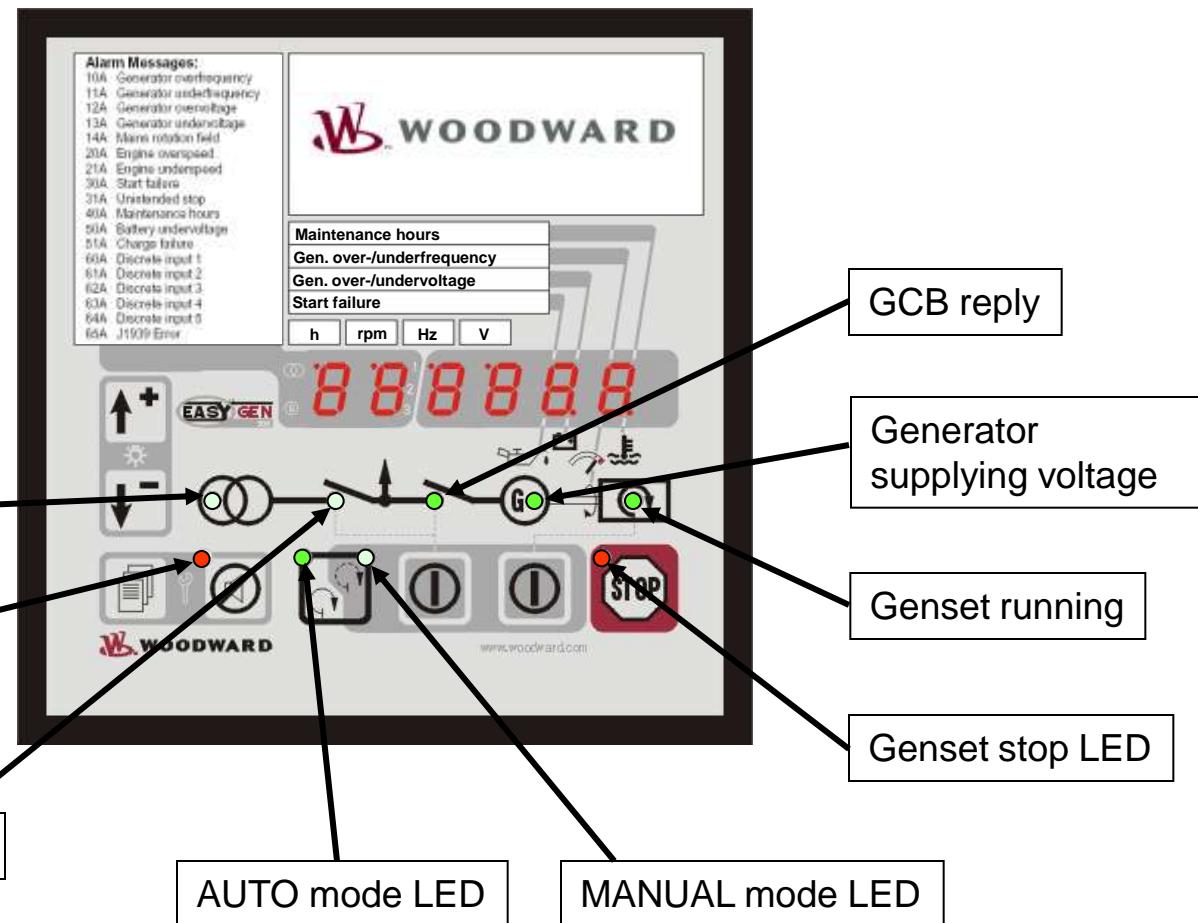

Display information:

- Operating hours counter
- Service hours counter
- Start counter
- Engine speed (X-package + MPU required)
- Generator/mains frequency
- Generator/mains voltage line to line/ line to neutral
- Battery voltage monitoring
- Charger voltage monitoring
- J1939 ECU codes (X-package required)
- Generator/mains V<>, f<>
- Mains field rotation
- Engine over/under speed
- Start fail , charge fail
- Alarms generated by discrete inputs

easYgen-300: Push Buttons

easYgen-300: LED's

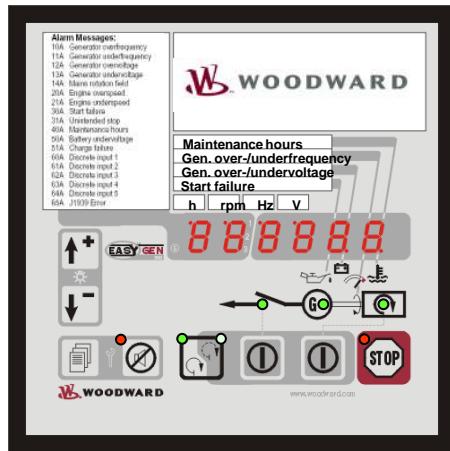

easYgen-300: I/O Set

- 1x generator voltage (1phase, range 120 to 480 Vac)
- 3x mains voltage (3phase, range 120 to 480 Vac)
- 5x discrete inputs (alarm, control; galvanic isolated)
- 4/6x discrete outputs (alarm, control, dry contacts)
- D+ input for aux. excitation and charger voltage monitoring
- 8x control push-buttons
- 9x LED for status display
- 6 digit 7segment LED for
 - alarm messages (8 displayed messages; more via codes)
 - configuration
 - operating values (generator and mains voltage/frequency, engine speed...., ECU Data and more via numeric codes)
 - counters (running hours, service hours, number of starts)

easYgen-300: Features

- Start/stop sequence
 - By discrete input (remote start)
 - Using push-button (Front Panel operation).
 - LOM (Loss of mains) with emergency power sequencing
- Maintenance call
- Event recorder with memory for 15 events
- Single-line diagram with status display of engine, generator, mains, and breakers
- Flush-mounting
- Service interface
- International front foil (via individual printed texts)
- /X-package additional
 - 1x speed input (pickup/inductive & switching)
 - CAN bus
 - 3 phase generator voltage measurement

Configuration via DPC-1

easYgen 300
RJ45 socket edgewise

RS232

Configuration cable
with galvanic isolation (black box)
DPC-1 P/N 5417-557

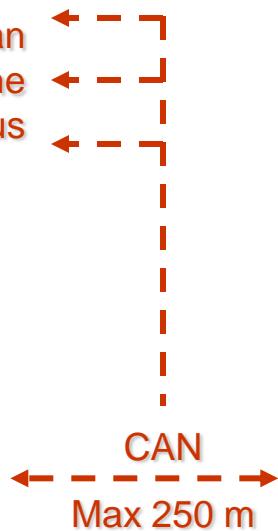

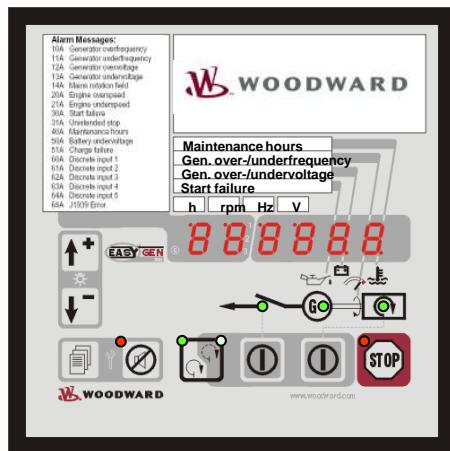

RS232
COM1

Laptop with Windows
operation system
9x, NT, ME, 2000, XP
LeoPC
Configuration possible

CAN to USB

up to 4 controls can
connected on the
same CAN Bus

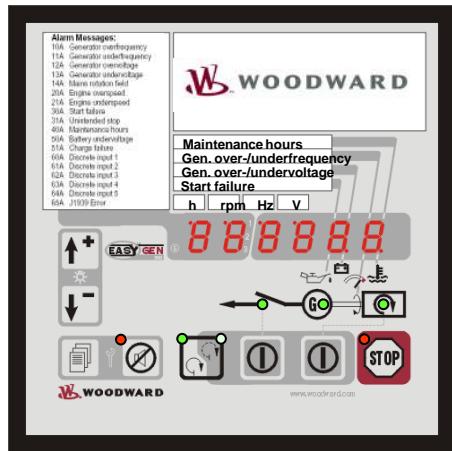

easYgen 320X/350X
Terminals 3/4

IXXAT CAN2USB converter
